The property features several oceanfront decks and balconies, two levels of terraced artificial grass nearthe water's edge, two furnished cabanas, and a new concrete path leading to the sea. While the naturalbeach is pebbly, the owner maintains a raked sandy area for easier water access. Guests can enjoy privacy,thanks to the owner also owning the undeveloped lot next door on the east side. The snorkeling here isincredibly diverse, with the few homes in the area contributing to the rich marine life. Guests often spotspotted eagle rays, octopuses, lobsters, eels, and various fish species around the coral heads. The waters areusually calm with little to no current. Unique Villa Features:
